

Description

ANTIBLAZE TMCP (formerly ANTIBLAZE 80) flame retardant is a neutral, chlorinated phosphate ester. This additive flame retardant may be combined in either side of a two-component urethane-package system to achieve outstanding long-term storage stability. Excellent flame resistance is obtained by adding low levels of this economical flame retardant to rigid urethane and isocyanurate foams.

Applications

ANTIBLAZE TMCP flame retardant may also be used in flexible urethane foams, coatings, acrylic latices, vinyl copolymers, nitrocellulose lacquers and epoxy resins.

Typical Properties

Appearance	liquid
Specific gravity @ 20 °C	1.29
Viscosity, cps @ 20 °C	78
Density, lbs/gal	10.75
Acid number, mg KOH/g	0.1
Phosphorus, %	9.4
Chlorine, %	33.0
