OPTICAL BRIGHTENERS

Main Chemical Composition: stilbene bistriazine derivative

Chemical structure:

C.I.NO. 31

Ionic character: anionic

Main Physics Chemistry Indexes:

1. Appearance: yellow uniform fine granular or powder.
2. Fluorescent Color: bluish tone.
3. Insolubility: 0.8% max
4. Moistures: 5% max

Application:

Mainly used for synthetic detergent, such as detergent powder, soap, detergent liquid, etc

Treating Process:

1.HQ31 can used for high-concentration, high-soluble detergent and white soap. HQ31 can homogenize with detergent powder through spray drying. The use amount is 0.5‰ ~ 1.0‰, the max amount is 4‰
